PROFESSIONAL SUMMARY

Software Engineer with 8+ years of experience building custom web software for startups and growing businesses. Skilled across the full stack, from complex WordPress and WooCommerce platforms to SaaS products, AI-powered workflows, and business automation systems. Focused on rebuilding unstable applications, improving performance, and designing scalable web architecture that helps businesses grow. Passionate about solving difficult technical problems and delivering software built right from the foundation up.

CORE SKILLS

Languages & Frameworks: JavaScript, TypeScript, PHP, Node.js, React.js, Next.js, Express.js

CMS & E-Commerce: WordPress (Custom Plugins & Themes), WooCommerce, Elementor, Headless CMS

Frontend & Design: HTML5, CSS3, Responsive Web Design, UI/UX, REST API & GraphQL Integration

Databases & Backend: MongoDB, MySQL, Firebase, REST API, GraphQL

AI & Automation: AI Integrations, LLM/GPT Workflows, n8n, Business Process Automation

AI-Assisted Development: Cursor, Claude, Codex, GitHub Copilot, Antigravity, Replit — rapid prototyping & vibe coding for fast delivery

Security & Server Management: WordPress Security, Server Management, Hosting & cPanel, DNS Management, VPS, Docker, Git

Other: SEO, Web Performance Optimization, Technical Consulting
